

BARREL COOLING & HEATING

NEW

A simple tube-in-tube heat exchanger designed for cooling and/or heating of individual barrels

Features:

- * Stainless steel construction measuring 32mm diameter x 800mm with 3/4" BSP inlet/outlet fittings.
- * Silicone bung to secure unit into barrel and allow insertion adjustment.
- * Easy clean.
- * Fits all sizes of barrels.
- * Simply connect to hoses from chiller/heater and circulate water or brine.
