Options

- * Sightglass
- * Butterfly Valve or Ball Valve
- * Racking plate complete with height adjuster for racking off lees
- * Non return valve

for racking and filling barrels

Gas Operated Spear

For racking, transferring and topping barrels using pressurised inert gas (Co2 or N2) instead of a wine pump. A very gentle way of transferring your delicate wines.

Features

- * Outer stainless steel shroud to direct inert gas to barrel
- * Ball valve to regulate gas into spear
- * ball valve to release gas pressure from barrel when transfer completed
- * Pressure gauge and pressure relief/safety valve
- * Silicone bung with adjustment to allow sealing of barrel
- * Safety straps to hold spear into position
- * Racking plate
- * Optional: Sight glass and butterfly valve
